

Find a Club Guide

When you open the Find a Club function the opening map is centred on the default search location of Parramatta NSW. This is simply to show a few clubs on the map on opening.

Note: Not all ANSW clubs have been entered, still re-building the site.

Opening Map

Search Markers

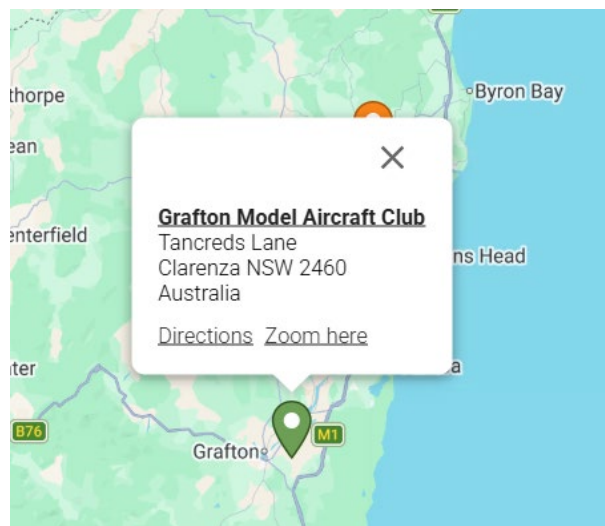

Searched location 

Clubs with search range 

Active marker, the displayed club you clicked on 

If you hover over a club marker  the club's name will be displayed.

If you click a club marker  the club details will be displayed as below, and the marker will change colour 

Searching

In the Search Bar, enter the location you want to search and select a Search Radius from the dropdown selection. You can leave the Results at 25. Click Search.

In the example below I have entered a Search Location of Coffs Harbour and a 200km Search Radius. Two clubs have been identified, and they are each shown with  and are listed to the left of the map.

Your location

Coffs Harbour

Search radius

200 km

Map Satellite

All underline sections, whether to the left of the map as above, or in the club details when you click on the club marker as shown to the right, are clickable links.

Note that some clubs do not provide contact details as they can be found on their website.

If you want to zoom in on a club then click on [Zoom here](#), then click on [Satellite](#), you will get an image like that on the right. Use the mouse scroll button to zoom in/out and click and hold to move the map view.

To find the route from your location to the club field, click on [Directions](#) and enter your starting address as you would when using Google Maps.

Where a club is located on a public road, it may also have a [Street view](#) option located between the [Directions](#) and [Zoom here](#) options.
